Andrew Stinson
Cisco SDA/DNA Expert

Firefly Deep Dive Cisco DNA Center and SD-Access

Course Overview

The Firefly Cisco DNA Center Deep Dive is a one-day session that gives you the opportunity to explore Cisco DNA and understand how it helps organizations build a more secure, reliable, and efficient network infrastructure that can support their digital transformation goals.

In this highly interactive live expert-led event Andrew Stinson will whiteboard and walk you through key practical steps and considerations needed for the successful implementation of DNA.

Prerequisites

IT professionals who already possess a strong working knowledge of Enterprise networks will gain the most from this course.

Who Should Attend

This course is tailored for network engineers who already possess some knowledge of Digital Network Architecture.
